BASIC, ECONOMICAL, ENVIRONMENTALLY FRIENDLY, SL-2G LED SLIT LAMP

Long life LED illumination saves power, helps the environment and reduces bulb replacement.

Features

- » Three magnifications (10x; 16x; 25x)
- » Long life and power saving LED illumination

Still using halogen lamp illumination?

Light Emission Diodes (LEDs) are increasingly being applied to optical and medical instrumentation thanks to their clear and bright light, low heat illumination and long life. LEDs also have the advantage of being environmentally friendly reducing the waste of frequently replacing halogen and tungsten bulbs.

As a leader in Ophthalmic Instrumentation, Topcon is incorporating LED as the main illumination in its SL-2G slit lamp. The approx 10,000 hours lifetime of the LED is expected of 100 times longer than conventional halogen bulbs. This makes the SL-2G easier to maintain, economical and eco-friendly.

Quality of illumination

Uniform and consistent illumination is achieved by LED source.

Three magnifications

10x, 16x, 25x covers the needs for a comprehensive slit lamp examination.

Smooth illumination adjustment

The LED illumination can be adjusted continuously from 0 to maximum.

AC adapter

The AC adapter included with the SL-2G enables the use of any power source and adds flexibility to the installation in different types of furniture and delivery systems.
